Local Business Wins Prestigious Gold Excellence Award

South Bend, IN — Locally owned, Selge Construction, Inc. has won the Gold Excellence in Concrete Pavement award for their work on Western Avenue in South Bend, Indiana. The gold excellence award was given in the Overlays (Streets and Roads) category and was presented by the American Concrete Pavement Association. It is one of the first ever ACPA Gold Awards presented to a Michiana Paving Contractor.

The award is in recognition for the excellent work performed by Selge Construction on the reconstruction project which included seven blocks on Western Avenue in South Bend, Indiana. The work involved repairing the current pavement and roadway, which was estimated to be around 60 years old. The improvements also provided accessible sidewalks and street parking, as well as enhanced lighting for safety and an improvement in all-around aesthetics of the area. Marv Selge, Jr, president of Selge Construction Company said, “We are honored to receive this award on behalf of the entire team. This award was made possible by the great engineering of Abonmarche Consultants and by the creative thinking of the South Bend Department of Public Works. I’m so proud of the entire team at Selge Construction. Their hard work, integrity, and commitment to excellence has been recognized at one of the highest levels.”

The Gold Excellence in Concrete Pavement award comes in recognition of Phase II of the projected which was completed in 2017. The award and recognition were presented to Tom Lentz, concrete operations manager, on November 29, 2018 in Fort Lauderdale, Florida at the annual meeting for the American Concrete Pavement Association.

Selge Construction was founded in 1960 and has been in business for nearly 60 years. Over the last 60 years Selge has completed some of the most technically challenging projects in the Midwest.

Selge Construction has been built on the fundamental understanding that people are more important than profits. This core fundamental value has created a positive company culture, which has resulted in Selge Construction having some of the most tenured employee’s in the industry. Selge Construction serves municipal, utility, and commercial clients throughout the Midwest, specializing in underground utilities, excavating, directional drilling, earthmoving, and concrete work.
